AUDIOBLUE

OCCUPATIONAL HEALTH

WIRELESS
AUDIOMETER

BLUETOOTH
TECHNOLOGY

The **AudioBlue** was designed specifically for health services in the context of screening and fitness for duty. The device connects to your computer using the Bluetooth standard. You can pilot the test remotely via the intuitive **Otowin software**. The software also allows you to consult your database, create patient files, export data and print them.

MADE IN FRANCE

AN **INTUITIVE** OPERATION

Step 1: Pairing
No Bluetooth? Thanks to its Plug and Play USB connectivity, you can use it on any computer

Step 2: Measure
Launch the measurement via the Otowin software. Manually validate the patient response or use the wireless response button

Step 3: Charge the battery
Its day of autonomy and its fast charge (up to 80 % in just 20 minutes) allow you to never run out of battery

ECHODIA®

TECHNICAL CHARACTERISTICS
